5 bedroom penthouse in Recoletos

A classic duplex penthouse with a very Parisian style without equal, just a stone's throw from Retiro Park.

The house occupies the top duplex floor of an exceptional building built at the beginning of the 20th century by the architect Aníbal Álvarez Amorós, author among others of great architectural works such as the Bank of Spain building, also intervening in the development of the Colegio del Pilar and of the Linares Palace.

A true gem that combines history, culture and modernity. This 508 square meter penthouse distributed over two floors has 5 bedrooms and two large terraces with different orientations that have unparalleled panoramic views. With a privileged location and unmatched amenities, this property is a unique opportunity to enjoy the best that Madrid has to offer.
